#YESMOMENT
Festival Dictionary
Tony Thorne - Expert Linguist and Curator of the Lucozade Energy YES Moment Festival Dictionary

The festival is the place where niches, genres and cultures come together in a dynamic mix – and the space where the latest comic, exotic, original and edgy forms of language are traded.

Young people’s coinages are now probably the richest source of new language in the English-speaking world, and the slang of pre-teens, teenagers and young adults uses all the techniques of the world’s most influential (and probably most multifaceted and flexible) language in a riot of creative exuberance. Their codes are used firstly to create in-groups and to keep out the too-old and the terminally unfashionable, but also just to celebrate a heightened sense of being young.

New language is inevitably generated by new ideas and attitudes and new lifestyles. In that special component of our changing language that is ‘festival-speak’ it all comes together with the private language of friends, cliques, crews and posses, with local and regional oddities, with street slang and student slang, the language of music, dance and performance and the technical terms used by DJs and musicians. The resulting mash-up is above all a language of celebration, high-energy and collective enjoyment – even when it’s temporarily drowned out by different forms of noise, or when the rain is falling and the mud is clinging.
AMA-ZEBALLS
A term used to describe something that is impressive or excellent.

“OMG! That gig was totes amaze-balls!”

AMPED
When someone is excited or hyped up, made famous by the surfer/skater community.
